Sambhram Academy of Management Studies
and
Oracle India Private Limited
Organized one day workshop on
Android Mobile App Development for College Girls
On August 18-19, 2017
Report

Two-Day Workshop on “Android Mobile App Development for College Girl Students” was conducted by Oracle India at Sambhram Academy of Management Studies organized by the Academy’s School of Computer Science Wing. The platform for developing this app is Android Studio IDE which supports the languages like C++ and JAVA. Mrs. Nirmala S Head of the Department of School of Computer Science welcomed the participants and Resource Persons and Mrs. Sunitha introduced the latter to all. Dr. K.C Mishra, Principal, Sambhram Academy of Management Studies presided at the Inaugural session. The workshop was led by Ms. Kamaldeep Peter, Senior Program Manager and her team including four experts in this filed. They are Mr. Anup K Mishra, Director, Product Development, Mr. Hemanth Bansal, Mr. Deekshith Mantampady and Mr. Lalithkrishna Bandagadde. Total numbers of participants were 34 from nine Colleges in and around Bangalore.

The workshop was conducted in four sessions; the first session was all about the installation of Android Studio IDE; second was the presentation of theory aspects which are to be used when developing the app. These two sessions were in the 1st day of workshop. And in the second day both the third and fourth
sessions were real time work experience. How the app is developed, what all are the aspects of developing an app were presented by the resource persons and also developed an app named “Emergency”. Each and every person who participated in the workshop had their own PCs and had an experience of developing an app. Even the experts gave an idea of how data will be stored in the cloud, how can we upload the data to the cloud and what are the development aspects of data storing in a cloud. Along with upload of data the aspects of downloading was also discussed.

Each and every participant who participated in the workshop from various Colleges got an idea about how the environment of real time development will be and how to develop android app. Not only the development even the theoretical aspects, basics of developing the app, the idea in the whole development of app is understood. It was a very useful workshop where all of them gained some knowledge about how the corporate world is and what all are the works a developer does to develop a project.

The session ended with a valedictory function presided by Mr. V Nagaraj, Vice Chairman, Sambhram Group of Institutions; Mrs. Nirmala welcomed the gathering and Mr. Anup Kumar Mishra gave report of the workshop about the present trend in industries and how to improve the practical skills. He was of the opinion that to go beyond the horizons there has to be breakthrough in all the subjects and culture has to be molded to go beyond. Two participants expressed their views about the workshop. Mrs. Kamaldeep Peter, Sr. Program Manager, Branding and Strategy, Oracle extended vote of thanks. She was very much clear that Oracle is dedicated to Women Empowerment and this program exclusively meant for them.
